This is the address of Lab, State Lab, Collection Center or Specimin Pick Up Point:

Patient Name : Lab Tests Guide

Registered On : 01, Jan 2025 4:30pm

Age / Sex : 31 Years / Male

Reported On : 02, Jan 2025 5:24 pm

Contact No : +1234567890

Consultant Name: xyz Consultant

Specimen : Aerobic Wound Swab

Referred By : xyz Reference

Patient ID: 250101-234-2348

Lab. ID: 250101-234-2348

Registered By: Editorial Staff

Aerobic Culture Report

www.LabTestsGuide.com - www.LabTestsGuide.net

Microbiology

Specimin

Aerobic Wound Swab

Gram Staining

No any Bacteria Seen

Growth

No Growth is Obtained after 24 hours at 37°C

Clinical Significance :

No aerobic pathogenic bacteria were isolated, indicating no active aerobic bacterial infection at the wound site.

- Infection may be absent or caused by anaerobic/fastidious organisms.
- Could result from prior antibiotics or inadequate sample.
- Correlate with clinical findings; consider repeat or anaerobic culture if infection is suspected.

Aerobic Culture Report

www.LabTestsGuide.com - www.LabTestsGuide.net

Microbiology

Specimin

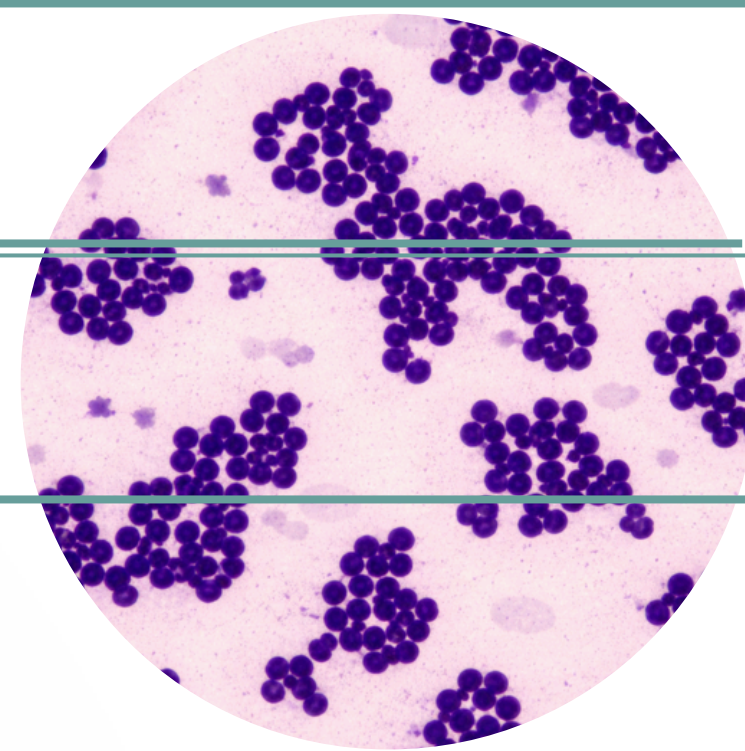

Aerobic Wound Swab

Gram Staining

Gram-Positive Cocci Bacteria Present

Growth

Growth of **Staphylococcus Aureus** is Obtained after 24 hours at 37°C

Sensitivity Testing :

Susceptible (S)

Resistant (R)

Clindamycin

Oxacillin

Daptomycin

Penicillin

Levofloxacin

Doxycycline

Vancomycin

Clinical Significance :

The isolation of **Staphylococcus aureus** from the wound specimen indicates the presence of an active **aerobic bacterial infection** caused by this organism.

- Confirms bacterial infection at the sampled site.
- Commonly associated with skin and soft tissue infections, surgical site infections, burns, and diabetic foot ulcers.
- Helps guide targeted antibiotic therapy based on antimicrobial susceptibility results.
