Biochemistry

Parameter Name	Result	Reference Value	Unit
5-HIAA (Urine, 24 Hrs) 5-Hydroxyindoleacetic Acid	4.3	0 - 10 mg/24 h	mg/24 h

Interpretation:

- Values within the reference range are considered normal.
- Elevated 5-HIAA levels may be suggestive of carcinoid tumors or increased serotonin metabolism.
- Results should be interpreted in correlation with clinical findings and other investigations.

Clinical Significance :

The 5-HIAA urine test is primarily used in the diagnosis and monitoring of carcinoid syndrome and neuroendocrine tumors associated with excessive serotonin production.
